

B&B WELDING COMPANY, INC

COME SEE WHAT WE DO

SteelDay & 45TH CELEBRATION Invitation:

B&B Welding Company is a 52 year old firm (45 yrs under current ownership) that has migrated from a portable welding shop to the Baltimore/Washington area's most technologically advanced steel fabricator. We took the hardest working people in the steel business and made them smarter. We gave them big, powerful machines, a written quality control program, added on AISC membership and the ability to electronically import designs straight from the engineers and what you have is one of the most technology-driven steel fabrication shops around.

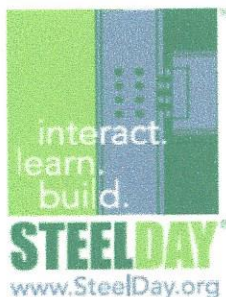

Attendees will tour our 35,000 sq ft fabrication shop with advanced CNC machinery & witness demonstrations of interoperability between engineering, detailing, estimating, production control & bar coding software including: Bluebeam, SDS2, Fabsuite & P2 Systems, Infosight, Shop Data, and Peddinghaus equipment. Attendees will learn about the processes steel fabricators go through from receiving the steel, fabricating the steel to shipping the steel to the jobsite. Also on sight will be Hilti Corp, Southern Galvanizing, and Powder Coaters who will explain what their process is in the steel fabrication business.

Event Details:

- Date:** Friday, September 30, 2016
- Time/Length:** 10:00 am – 3:00 pm
- Location:** 4640 North Point Blvd, Edgemere, MD 21219

SteelDay is an annual event hosted by the American Institute of Steel Construction, its members and partners. Plan your SteelDay visits and see firsthand why it makes sense to build with steel.

There's always a solution in steel. Now you know where to find it.
